i have created two flask project  
localhost:5001/ask  
localhost:5002/learning

i want to run the my project by setting nginx with service files

 Memory updated

To set up NGINX with service files for your Flask projects, here's a step-by-step guide:

## Step 1: Configure Systemd Service Files

1. **Create two service files** for your Flask applications (one for each project).

For example:

**/etc/systemd/system/ask.service**

```
ini
```

 Copy code
